# Stratos.

The large board design makes starting easy, allowing riders to begin from a standing position rather than lying down. This feature is ideal for beginners, offering stability and confidence right from the start.

A forward battery placement ensures balanced weight distribution, providing a smooth, progressive lift that's perfect for new riders. It also enables a more natural foil stance, positioning you directly above the foil for better control and a ride that feels closer to surf foiling than traditional e-foils.

Safety is a top priority with the magnetic kill switch, a key feature that significantly reduces the risk of harm to the rider.

The board is fully compatible with all Hyperlite front foil wings, giving you the flexibility to customize your ride. Crafted with a premium carbon board and aluminum prop, it's built for performance and durability.

Assembly is quick and hassle-free. Simply plug in the battery, attach the foil kit with M8 fasteners, and you're ready to hit the water—no extra cables or wires needed.

Enjoy up to **90 minutes of ride time**, tailored to your skill level.

Recharge in just **1 hour and 45 minutes** for more fun on the water.

Crafted with **premium carbon fiber** for unmatched durability and performance.

**5 Feet 10 inches length** – Perfectly sized for effortless control and maximum performance.

**MagniLeash** – Exclusive Hyperlite technology—a Magnetic leash with a kill switch for enhanced safety.

Weighing under 180 lbs - You can **stand and ride right away**—no need to start on your knees. 5'10" in length for optimal performance.

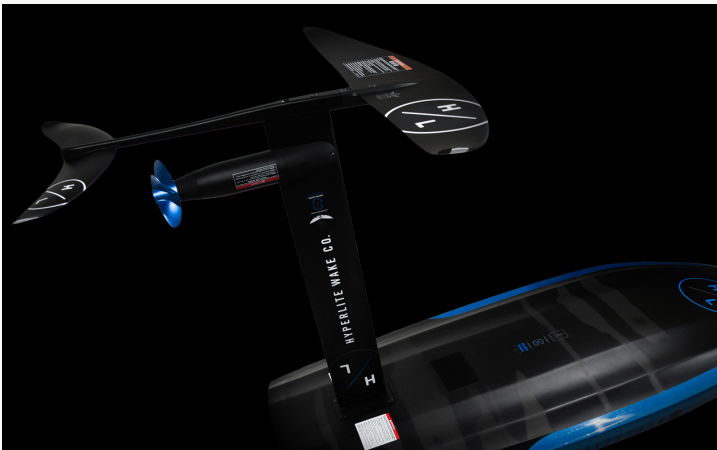

**135-Liter Board** – The most user-friendly e-foil on the market.

**Battery is positioned** further forward enabling a more natural surf-style stance without forcing your toes to the front nose of the board.

**Plug-and-play setup** – no messy wires, just unbox and ride. Ready to use instantly!

# Stratos.

**Easy for Beginners:**

The large board lets you start standing, no lying down required.

**Better Balance:**

Forward battery placement ensures smooth weight distribution for easy lifts.

**Natural Stance:**

Stand directly above the foil for more control and a surf-like ride.
